

Profile

## Co-founder & Full-stack Developer

Co-founder of Dotless, an AI business-discovery tool for freelancers and web agencies. Built with one other person and now serving 11,000+ users. Alongside it, a backend internship at WEZEO building AI features and workflow automation. Still at secondary school, already shipping production software.

Experience

|                                                                                                                                                                                                                                                                                                                       |                    |
